THE TRAVELS OF ST. PAUL.

DR. RAMSAY AT AUBURN THEOLOGICAL SEMINARY.

THE DISTINGUISHED PROFESSOR OF ABERDEEN

UNIVERSITY DELIVERS HIS FIRST LECTURE IN THE MORGAN COURSE.

Auburn Sept. 27.—The Morgan lecture course in Auburn Theological Seminary for 1894 was begun afternoon at 4 o'clock. These lectures. instituted through the liberality of Henry A. Morof Aurora, N. Y., have annually awakened Paul's travels, the narrative, its author and

the seminary to Mr. Morgan. He said:

It is the liberality of Mr. Morgan and others, so modest and yet so elaborate, that makes it possible for us to be here on this occasion, and inquire into God's word and the way it is considered in other lands. Two years after Columbus discovered America there was established at the mouth of the river Deen a university which afterward became the University of Aberdeen. A distinguished man of that university, known throughout the entire world for his researches in Pauline writings, is here to-day. He comes bringing his own researches and the wealth of the Oxford libraries. This is an unusual opportunity to hear the latest thought on the Pauline portion of the New Testament.

Dr. Booth then introduced Dr. Ramsay, who was

Dr. Booth then introduced Dr. Ramsay, who was received with applause. He said in part:

Dr. Booth then introduced Dr. Ramsay, who was received with applause. He said in part:

It was the courtly politeness of the invitation of President Booth which persuaded me to come to this country. Since I landed here my diffidence has increased. I come to a nation of orators, but Eshail give in plain terms the facts and trust to you to weigh them for yourselves. It would be plain assumption for me to treat this subject in any way but the historical. Christianity is not merely a religion; it is a system of life and action. It introduced into Roman society changes of immense consequences. There is a history of the highest grade which brings with it genius and gives a sympathetic shade to the events. The writer of such history touches briefly the less important matter, but makes, on the whole, a more idealized picture. There is one method which aims at being complete, passing over nothing. This method has not come down from antiquity; it is the product of later years. It is the work of art.

The first essential quality of history is truth. What the historian says must be the truth—not only truth in detail, but in effect. Great historians are rare. The typical example of these is Thucydides, and it is doubtful if any other ranks with him. But since history must be criticised, the keenest criticism will do best in the long run, But the critic also must be true. There is no class of literary productions in which there is greater diversity of opinion than in historical criticism. To one, Herodotus is the father of history; to another, he is but a reproducer. I venture to add one more to the order of critics when I make the statement that the author of the Acts belongs to the first rank among authors. The most important group of critics compists of those who say that the facts given in the Acts are absolutely true. They recognize signs of extraordinary trustworthness. But when they compare the most without prejudice. I began with my mind fairly without prejudice. I began with my mind

which showed marvellous truth. I found it a useful ally in many investigations.

Yet this history led Paul through ways which seem to me self-contradictory. It may appear a small matter whether Paul traveled through the north of through the south of Galatia, but when we consider that when we apply the marrative of the travels of one section to the description of the other section and they do not agree we see the importance of the question. Such is the case in Acts. Generations and centuries have been applying the facts to the wrons section of country. For the sake of clearness I shall speak of the North and the South Galatian theories. It has been generally supposed that the Galatian churches were situated in the north of Asia Minor. This theory was held unquestioned as early as the fourth century, when a German scholar proposed the South Galatian theory. During the last two years three German critics have revived this theory, and many of the best of English writers have been compelled to accept it.

It fell to my lot to be invited by Dr. Fairbalrn to give a series of six lectures on the early Church in Asia Minor. In the miroductory chapter I was brought face to face with the question what and where were the Galatian churches. I found clearly the falsity of the belief that they were in Northern Galatia. I had to rewrite my introduction so many times that it finally became a separate part of the

where were the Galatian churches. I found clearly the fasts of the restrict of the fasts of the restrict of the fast that finally either of Galatian should be deed that this claim cannot be substantiated. In the second place, it is claimed that this claim cannot be substantiated in the capter of the fast of the fast

used, but Galatia territory. The same distinction is now used in regard to Britain and British territory.

In the course of these lectures I shall attempt to show that the narrative of St. Paul's journey is sufficient to prove the South Galatian theory. Our hypothesis is that the author of the Acts was a real historian accustomed to the facts as they were related. The plan of these lectures is not to over-throw every other argument, but to expound a simple theory, it is a rule of criticism that the simple theory, if it fills the conditions, must take the place of the complex. Assuming at the start that the Acts were written by a person familiar with the facts, it is not necessary to solve every difficulty or to show that the author never made a mistake. We are now simply making an investigation into the date of his writing. Further, to study every historian's method is not to judge him as to whether he uses our method. We must shortly study Luke's method in this way, I use the name Luke because if written by one man in the first century that man must have been Luke. In regard to style, his style must show ever very harsh transitions. Chronology is often absent. In the Acts it is clear that, unless our theory is false, the author studied the facts, though when he completed one event he went back a little way to begin another. This is true of all historians. His language is clear and simple, but often obscure on account of brevity. To understand Luke we must take some part of his work where we have special guides and aids—some external criterion. This we shall find best where the geography and antiquity of some known country are studied.

At the close of this introductory lecture Dr. Ramsay requested the audience to examine carefults the last two chapters of the Book of Acts be-

But, it was said, it was not until toward the latter end of the last century that the drama of Germany attracted the attention of the other nations of Europe. In 1765 the merchants of Hamburg combined to establish a theatre in that

Miss Marin Bender, whose death at the house of her sister, Mrs. Joseph Warren Jefferson, wife of a son of the great actor, is reported from Buzzard's Bay, Mass., was well known in Brooklyn. She was the daughter of Mrs. Peter Bender, of that city to the Gilbert Dramatic Society. Mrs. Bender's cousin is the husband of Annie Ward Tiffany, the actress, and through her influence they went upon the stage. Blanche met young Mr. Jefferson and the stage. Blanche met young Mr. Jefferson and was married to him, and her sister took her place in the company playing "The Stepdaughter," in which she had appeared. Marin was afterward in the "Old Homestead" company, and later appeared in "The Algerian" and "The Fencing Master." She went on the road with the company presenting the latter, and at Pittsburg was taken ill a week ago. She had become exhausted by the rehearsals, as she was only twenty years old. Her sister, Mrs. Jefferson, met her in New-York, and took her to Buzzard's Bay. She was not regarded as dangerously ill until Tuesday, when she died. The funeral will be held at the house of her uncle, Hönry Wilson, at No. 257 Monroe-st., Brooklyn, this afternoon. Brooklyn, this afternoon.

In the last days of the year 1891 a great public crime was committed in this State. An agent in the commission of the crime came before the people at the election held last year, and although he was a candidate of the more numerous party he was defeated by an adverse majority of more than 100,000 votes. But if a mere agent in the villany was punished with that severity, how will the electors of the State treat the principal at the polis? ALL IT HAS TO SAY.

From The New-York Sun. From The New-York Sun.

The Democratic State Convention at Saratoga yesterday broke away from the control of its chairman, and with great enthusiasm nominated that chairman, David B. Hill, for Governor by acclamation. The ticket was completed by the nomination of Damel N. Lockwood, of Buffalo, for Lieutenant-Governor, and William J. Gaynor, of Brooklyn, for Judge of the Court of Appeals.

The Convention was harmonious in every respect.

Prom The Commercial Advertiser (Rep.).

It was the madness of political criminality that urged the Democratic leaders not quite three years ago to steal the Senate and Assembly from the party whose representatives had been surely elected to a majority of the Legislature in both branches, a madness that stamped the party with the brand of a great crime. It was retributive and outraged justice that forced Governor Flower, through David Bennett Hill, to reward with an appointment to the Court of Appeals the chief instrument of that audacious robbety. It was the unappeasable and divine wrath of Justice that inflicted upon Hill and Flower the fatuous folly that insisted upon a nomination of their reproduced tool, the same Maynard, to be, by election, the same Judge that Flower had made him by appointment. Thereupon ensued the world defeat of Democracy, in punishment of its crime; the restitution of the Legislature to the Republicans who had been robbed; the Lexow Committee with its revelations; the destruction of the Brooklyn Ring; the coming annihilation of Tammany.

And now the people of the State are bidden to observe how the chief contriver of that colossal malefaction, David Bennett Hill himself, is forced by the process of the very wrong he set in motion to abide its fatal consequence. From The Commercial Advertiser (Rep.).

WAR AGAINST THE ADMINISTRATION.

From The New-York Recorder (Rep.). From The New-York Recorder (Rep.).

In its relation to National politics the nomination of Hill is a most startling and significant rebuke to President Cleveland. The stone which the builders rejected has been made the headstone of the Corner. The one man in this State whose hostility to the Administration was known by all politicians to be inexorable has been chosen to lead a life-and-death struggle against the hosts of aggressive and conficient Republicanism at a time when no distinctive friend of the Administration could be found to accept the responsibilities of such leadership. No President has ever received such a stap in the face from the organization of his own party in his own State. The attitude of the Cleveland element in New-York will now be a matter of entrancing golitical interest. All the crow-sating to be done this year will have to be done by the adherents of the Administration.

A FORLORN HOPE DOOMED TO DESTRUC TION.

From The New-York Press (Rep.).

It is a ticket of foriorn hope. Driven to desperation, with the precipice of defeat before them and the tidal wave of popular indignation behind them, the Democrats have made a rally. They have summened their ablest leader to the front and begged him to save them from impending doom. But what can Dayd B. Hill do to rescue the Democracy from the penalty which the people have determined to indict? What can Lockwood do? What can Gaynor do? Are these men prepared to recall the programme of destruction for American industry, to restore labor to the unemployed and wages and comfort to the countless homes throughout New-York State that have been made miserable and desolate by the very policy for which their party stands sponsor? Are the candidates of the Democracy empowered to demand that President Cleveland, Speaker Crisp, Chairman Wilson, Senator Mills and others shall retract their declaration that the war against protection will be continued, that there shall be no rest for the business man and no opportunity for the workingman to obtain lasting and remunerative employment? Not The men who hominated this ticket and the man who heads the ticket had the chance at Saratoga to make their voices heard in defence of American labor and in denunciation of its enemies, but they were silent, except to give approval and indorsement to the policy of destruction. From The New-York Press (Rep.).

THE THOUSANDS WHO WILL NOT SUPPORT HUJA

From The New-York World (Dem.).

From The New-York World (Dem.).

The result of the Democratic State Convention will create great disappointment, surprise and admiration. Disappointment because the most ordinary common-sense in political affairs must perceive the crying necessity for union, harmony, reconcilitation and genuine cathusiasm in the present critical campaign. It was particularly necessary that the moral and the independent elements in the party be satisfied. Now that the alternative is between Hill and Morton, of course no Democrat will go to the and Morton, of course no Democrat will go to the polis to vote for Mr. Morton. How many may not vote for Mr. Hill is another question. Indeed, that is the question of the campaign.

SOMETHING THAT WILL BE DONE. From The Evening Telegram (Ind.).

Senator Hill will, at any rate, give the Republi-cans something to do in this campaign. David B. Hill was nominated yesterday at Saratoga, He is a Democrat.

AN ACT OF DESPERATION. From The Mail and Express (Rep.).

Nothing but desperation could have led a sober-minded convention of Democrats at this peculiar time, when the State is in arms against machine politics in both parties, to head the State ticket with a machine leader and to tack on the tail one of the most outspoken and resolute anti-machinists,

REPEAT LAST YEAR'S GOOD WORK. From the Brooklyn Times (Rep.).

From the Brooklyn Times (Rep.).

There was a great uprising of the popular sense of righteousness last year. Palmer, the Republican candidate for Secretary of State, was elected by \$2,000 plurality, but Isaac H. Maynard, the chief agent in the signatic villary by which the control of the State Legislature was stolen by the Democrats, was snowed under an avalanche of 101,000 hostile ballots. Maynard was the chief agent, but he was not the instigator not the chief beneficiary of that unpardonable sin. It was the brain of David B. Hill that devised the crime; it was under his orders that Maynard carried out his part of the disgraceful conspiracy; it was David B. Hill that prostituted his authority during the last hours of his zervice as Governor to remove the honest officials who stood in the way of the foul intrigue and to appoint his supple tools in their piace; it was Hill that rewarded Maynard by compelling his appointment to the bench of the Court of Appeals; it was Hill that profited by the crime through the opportunity it afforded him to enact the disgraceful measures by which he thought to fasten the yoke of his machine upon the State for all time. Hill had already fled to the safe cover of the United States Senate, where he believed himself safe from nopular indignation, but the bilad madness of his party has again forced him into the field and given the honest people of the State the opportunity to printsh nim as they punished his plant tool, Maynard.

out of account, for the effect of it on the suffrage will be apparent.

GLOOM WITHIN THE RING. From The Brooklyn Citizen (Dem.).

We do not say that the ticket is doomed to defeat.
What we say is that rarely have the representatives of the Democratic party shown less capacity
for rising to the height of a great duty or taking
advantage of a splendid opportunity. HELLO, CENTRAL! GRAY GABLES, PLEASE From the Brooklyn Standard-Union (Rep.).

Will Grover speak one word for David in return for the many words Hill did not say about Grover that he might have said, and the few he did say for him at Saratoga? Oh, say! What will Cleve-land say? Will he furnish the saccharine basis for a castle of candy with two towers of taffy?

WHAT A THING TO SAY OF THE PARTY!

From The New-York Mercury (Dem.).

The ticket nominated by the Democratic State Convention at Saratoga yesterday is probably the strongest one 'hat could have been named. Hill, Lockwood and Gayner! Certainly 'The Mercury' can think of no stronger combination of names to appeal to the hearts and minds of that great army of good clitzens which constitutes the Democratic party in this State.
